What's old is new again: assessing invasion potential of a rabies virus vector

PLOS ONE

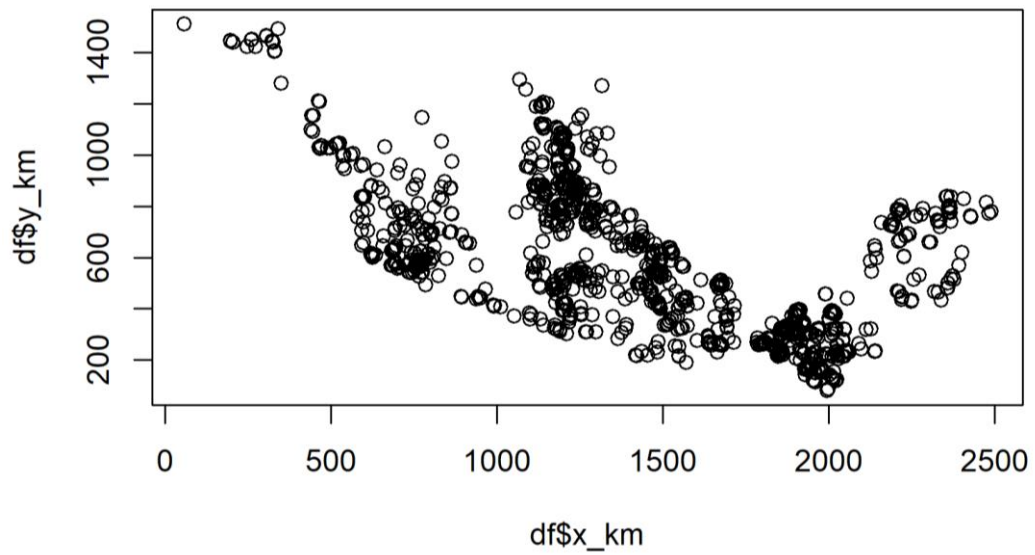

Fig 1. Vampire bat locations used in the final analysis, using approximate distance in kilometers from an origin.

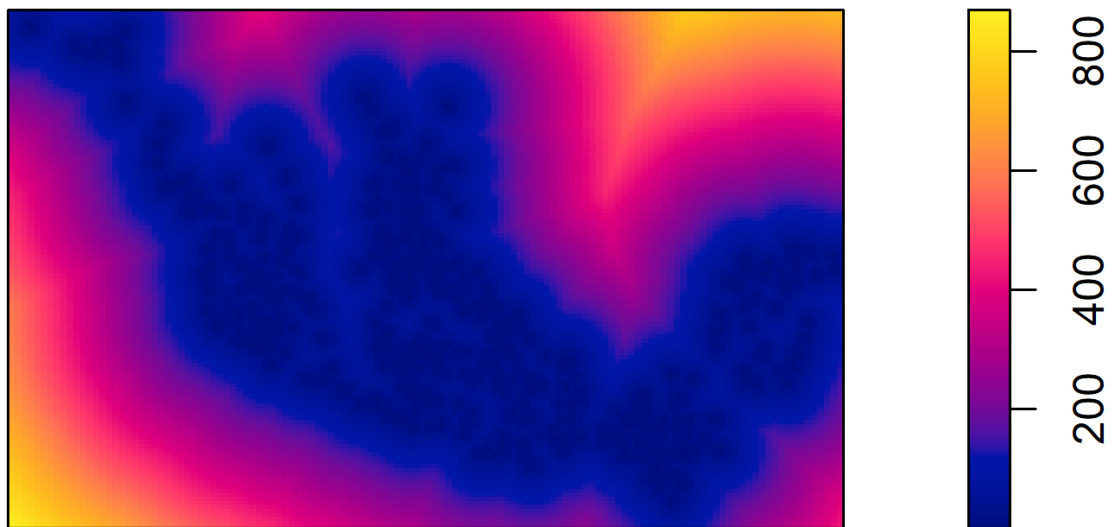

Fig 2. A distance map of distances among vampire bat locations used in the final analysis.

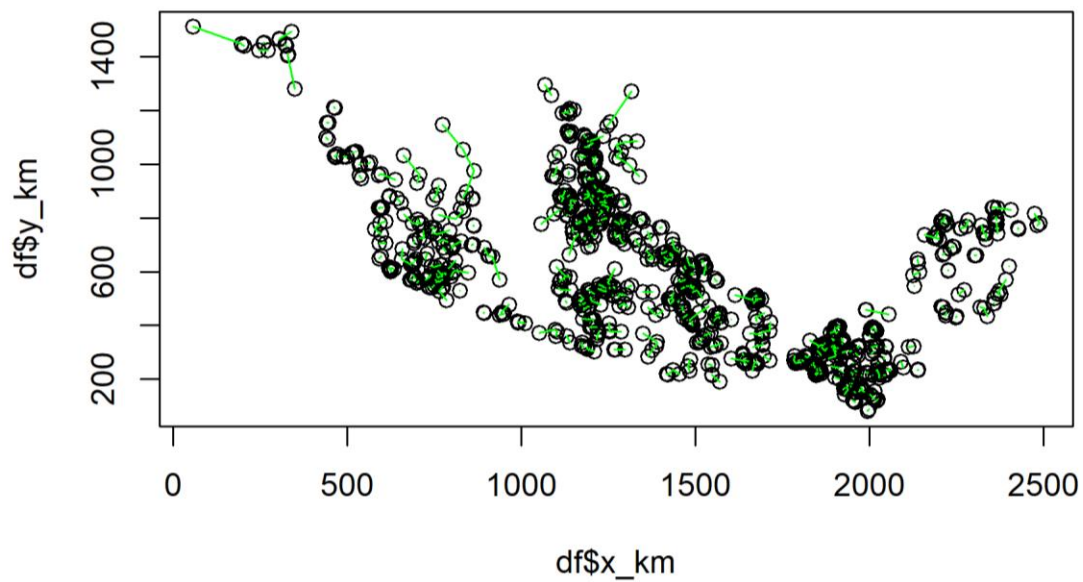

Fig 3. Mapped nearest neighbor distances between nearest neighbor pairs of vampire bat locations.

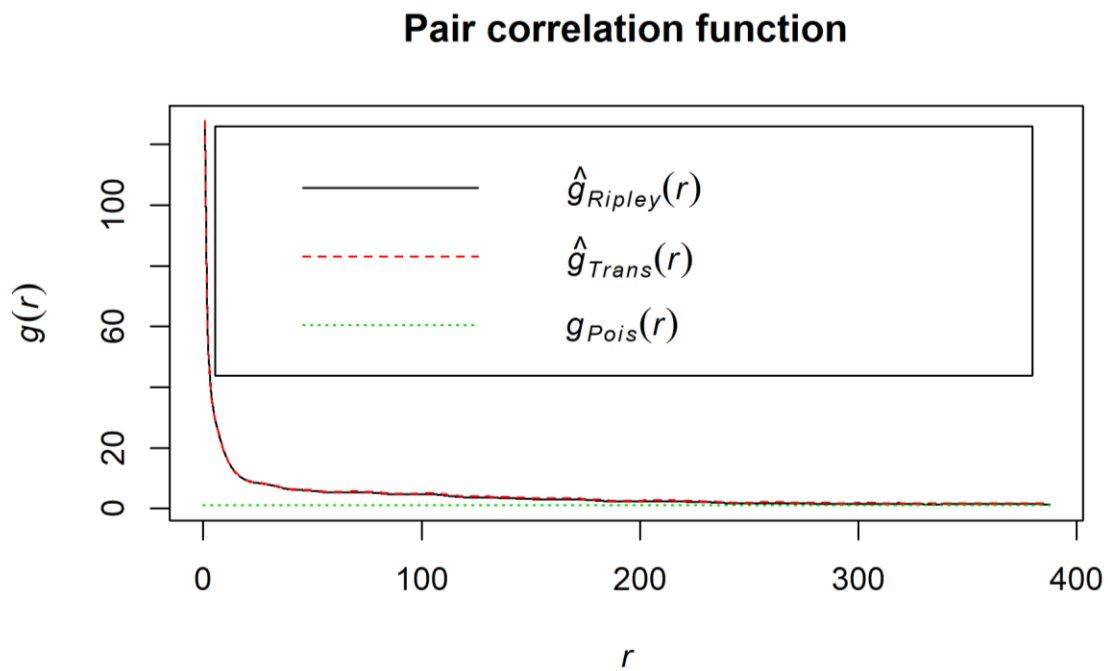

Fig 4. Pair correlation function plot for correlation between pairs of vampire bat occurrence records.
